

ID	UC1
Title	Process Offerings
Description	The administrator makes offerings available. Instructors select lessons. Public can view offerings
Primary Actor	Instructor, Administrator
Preconditions	Administrator and Instructor are identified and authenticated. Lesson details (schedule, space, typeOfLesson) are available to create offerings
Postconditions	Offerings are created and saved. Offerings are accessible to view for instructors and clients
Inputs	Credentials, Lesson details (location, typeOfLesson, schedule)
Outputs	Creates a list of Offerings
Main Success Scenario	The administrator logs into the system. The administrator receives a list of spaces available from the organization/system according to the schedule for each space. The administrator adds and manage the list of offerings available to instructors. The administrator inputs the location, space, schedule, and type of lesson The system validates the inputs and create a new offering. The instructor logs into the system. Instructors select the lessons they wish to teach based on their location and specialization. The system saves their selection. The system publishes in the public posts the list of Offerings to the public.
